

# Virtual CISO and Managed Services

Your in-house security team that suits  
your needs at a fraction of the cost

## Virtual CISO services to build a quality security posture

We are your trusted advisor that can bring decades of experience and a host of vetted partners so you can stay ahead of the cyber criminals and keep building your business and servicing your customers.

Small to medium sized businesses are at greater risk than ever before and are often hard pressed to prepare and respond to those threats. Being small doesn't offer protection when attacks are initiated through automation (bots).

- Our experts are available 24/7 and include:
  - » Experienced breach managers
  - » Experienced security specialists
  - » Legal and privacy experts
  - » Public relations experts
- Our team will work with you every step of the way to reduce damage.
- Our priority is to get you back to doing what you do best, as quickly and safely as possible.

**We help you respond when the worst happens.**

Cyber attacks and threats have changed dramatically in their frequency, size and sophistication over the last two years. Most companies are often not as protected as they think.

We help you access solutions often reserved for only the largest companies at a cost that fits your budget.

Provide guidance, advice and direction

Evaluate your new and existing partners

Leverage validated partners as team force multipliers

Work with you to develop or enhance IT strategy roadmaps

Tailored security and IT reviews and audits

Work with your leaders to improve awareness and understanding

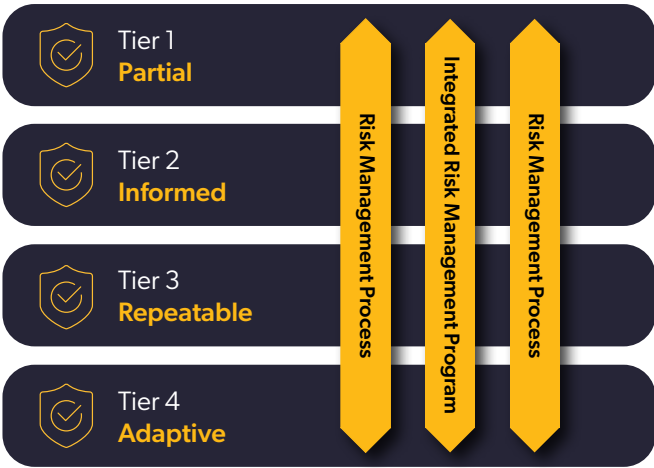

## The cost to your business of getting it wrong is significant.

- Disrupted operations
- Damaged reputation
- Lost revenue and impact to income
- Loss of business-critical data

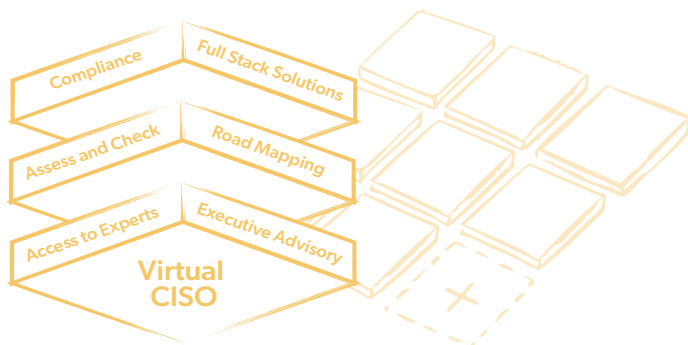

# The BOXX NIST compliance practice

- Based on a globally accepted standard.
- Two approaches:
  - » General assessment based only on the 14 National Institute of Standards and Technology (NIST) Key Objectives
  - » Full assessment on all requirements within each key objective
- Allows clients to engage in a way that works for them and to throttle the effort and cost based on risk assessment.
- Results can feed further data analysis on typical or recurring risk mitigations.
- Drive more awareness and acceptance of managing cyber risk profiles more actively.

## Putting it all together

We help you identify and close gaps to make your technology, process and people digitally safer.

vCISO POWERED BY THE

# /Hackbusters

### Personalized Security Health-check designed for everyday businesses

Tailored assessment to identify loopholes and blindspots. Choose from an industry standard NIST approach or a more targeted assessment.
